Jeremy Burgess, Manager

We have considered management judgments and accounting estimates included in the financial statements and believe them to be reasonable.

There were no disagreements with management during the engagement.

Recent Accounting Pronouncements

In February 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-02, "Leases (Topic 842)." ASU 2016-02 is intended to improve financial reporting about leasing transactions.

The ASU affects all companies and other organizations that lease assets such as real estate, airplanes and manufacturing equipment.

The ASU will require organizations that lease assets, referred to as “Lessees,” to recognize on the balance sheet the assets and liabilities for the rights and obligations created by those leases.
An organization is to provide disclosures designed to enable users of financial statements to understand the amount, timing and uncertainty of cash flows arising from leases. These disclosures include qualitative and quantitative requirements concerning additional information about the amounts recorded in the financial statements.

Under the new guidance, a lessee will be required to recognize assets and liabilities for leases with lease terms of more than 12 months.
Consistent with current GAAP, the recognition, measurement and presentation of expenses and cash flows arising from a lease by a lessee primarily will depend on its classification as a finance or operating lease. However, unlike current GAAP, which requires only capital leases to be recognized on the balance sheet, the new ASU will require both types of leases (i.e., operating and capital) to be recognized on the balance sheet.

Non-public companies will be required to adopt the new leasing standard for fiscal years beginning after December 15, 2019.
